eBlaster®

W For Windows NOW SUPPORTS VISTA

Knowing **EVERYTHING** They Do Online is as Easy as Checking Your Email

NEW 6
VERSION

See **EVERYTHING** your Children or Employees Do on the Computer from **ANYWHERE** in the World

ARE YOUR CHILDREN:

- Visiting inappropriate web sites?
- Chatting with child molesters online?
- Spending too much time on MySpace?

ARE YOUR EMPLOYEES:

- Stealing company secrets?
- Goofing off online?
- Or worse?

Find out today with eBlaster - the most dependable, full-featured remote surveillance software available

Install and Walk Away

Install eBlaster on the computer you wish to monitor and walk away. It's that simple! eBlaster will immediately go to work by automatically recording **EVERYTHING** your children and employees do online, including:

- Emails Sent and Received
- Both Sides of Chats and Instant Messages
- Keystrokes Typed
- Files Uploaded/Downloaded
- User Activity

- Web Sites Visited
- Online Searches
- MySpace Activity
- Program Activity

and a whole lot more...

See Their Online Activity

eBlaster recordings are organized into an easy-to-read Activity Report that is automatically sent to any email address you choose... as often as you like. Now, no matter where you are (at work, in another room in your home, at an Internet café, on vacation – even if you are thousands of miles away) you can keep watch over the online activity of your children or employees.

Be Notified Real-Time

See inappropriate messages from strangers to your children or between employees as they occur! eBlaster Instant Notification keeps you "in-the-know" by automatically sending you an exact copy of every email, chat and instant message as they occur.

Detect Danger

eBlaster will scan your recordings for sensitive words or phrases and send you an immediate Keyword Alert

eBlaster will:

RECORD

Everything your children and employees do online and on the PC is recorded by eBlaster.

REPORT

Recordings are organized into a detailed **Activity Report** that is sent to your email address, as frequently as you wish.

FORWARD

Every email, chat and instant message is forwarded to your email address with **Instant Notification**.

ALERT

Keyword Alerts warn you of potential danger when any word or phrase on your watch list is detected.

BLOCK

Stop repeat abuse by **Blocking** any web site or person you don't want them chatting with.

via email if danger is detected.

Block the Bad Guys

Now that you KNOW which web sites they are visiting, the people they are chatting with and what they are chatting about... how do you handle the bad guys? With eBlaster it's easy... just click BLOCK! eBlaster allows you to quickly block access to web sites you determine to be inappropriate and people you don't want them chatting with.

Instant Notification via Email

Time-sensitive events — such as an online predator's chat room advances directed toward your son or daughter, or an employee's emailing company confidential information — require immediate action. That's why eBlaster employs Instant Notification to provide you with an EXACT copy of every chat conversation, instant message, and email.

Get Copied Instantly on Chats and Instant Messages

Only eBlaster helps you protect your children and monitor your employees by recording and immediately forwarding you a copy of their chats and instant messages on:

- ▶ Google Talk
- ▶ MySpace Chat
- ▶ Skype
- ▶ Meebo
- ▶ Trillian
- ▶ AOL IM
- ▶ AOL Chat Rooms
- ▶ MSN Chat
- ▶ Windows Live Messenger
- ▶ Yahoo Chat & many more

Example: Instant Chat & IM Forwarding	
 8:00 PM	Your son goes online while you work late at the office.
 8:20 PM	He sends an Instant Message to a group of friends saying: "Dad's working late. Party at my house in 30 minutes!"
 8:21 PM	User "JimB17" replies: "I'll bring the beer!"
 8:22 PM	Your son responds: "Great! Come on over."
 8:23 PM	Within seconds, eBlaster sends you an EXACT COPY of this instant message conversation to your work email address.

Get Instant Copies of Email Messages

No other product on the market records and INSTANTLY forwards incoming and outgoing emails, including:

- ▶ Yahoo Mail
- ▶ Hotmail
- ▶ Google Gmail
- ▶ AOL email and webmail
- ▶ MySpace webmail
- ▶ Outlook
- ▶ Outlook Express
- ▶ Microsoft Exchange

Example: Instant Email Forwarding	
 4:00 PM	Your daughter comes home from school and goes online.
 4:15 PM	She receives an email from a guy named Tom.
 4:16 PM	Within seconds, eBlaster sends you an EXACT COPY of this email to your work email address.
 4:30 PM	Your daughter replies to the email from Tom.
 4:31 PM	Within seconds, eBlaster sends you an EXACT COPY of her reply.

Keyword Alerts

Detect Danger and Take Immediate Action to Prevent Harm

eBlaster goes the extra mile by proactively scanning computer activity for inappropriate words and phrases. If one of these keywords is detected in an email, web site, chat conversation, instant message – or simply typed on the keyboard – then eBlaster goes into overdrive by taking a quick snapshot of the computer screen. This screen snapshot, along with other details of the offending keyword, are immediately sent in a Keyword Alert to your email Inbox. Now you have a clear picture of EXACTLY what they were doing when the alert was triggered.

Activity Reports Delivered on a Schedule

eBlaster creates a detailed, comprehensive report of their online and PC activity and then emails it to you as frequently as you choose. Every eBlaster Activity Report includes:

Chats and Instant Messages

See a transcript of their chat conversations and instant messages. Know who said what to whom and when. Are your children or employees chatting inappropriately? With eBlaster, you can prevent chat and instant messaging with any individual you deem objectionable by selecting their chat ID and clicking "BLOCK"!

Email Activity

See all incoming and outgoing emails. eBlaster reports who sent it, who received it, the subject of the email, and the time and date the email was sent or received and much more. eBlaster even records web-based mail services such as Google Gmail, Yahoo mail, Hotmail and more.

Web Sites Visited

Review the name and address of EVERY web site they visit. Find out how much time they spend at those sites and how frequently they visit. Know if they are spending all day on MySpace, playing games online, shopping during work hours and more.

MySpace Activity

See when they update their profile, post pictures, make comments about other MySpace users, send messages to other users, invite someone to be a friend, accept an invitation from a new friend, and much more. Find out if they have multiple MySpace accounts and just how much time they spend on MySpace.

With eBlaster, you'll know if your 13 year old is communicating with a 40 year old who has posted inappropriate pictures of

See a web site in your report that they shouldn't be visiting? Just click "BLOCK" to prevent them from ever accessing that web site again. The next time they try to visit that web site it won't open or display in ANY web browser on the PC.

himself or talks about using drugs and alcohol on his profile page.

Online Searches

See what they have been searching for on the Internet, and how often they search for these topics. Activity Reports cover Google, AOL, MSN, Yahoo and many other search web sites.

Files Transferred

eBlaster reveals the files they uploaded or downloaded via the Internet. See if they are posting pictures of themselves on MySpace or videos to YouTube. Find out if they download illegal software, pornographic pictures and video, music files, and more.

Keystrokes Typed

Read EVERYTHING they type on the computer, whether part of a chat conversation, an instant message, an email, a Word document, or even a password.

Program Activity

eBlaster provides you a comprehensive overview of ALL applications used on your home or office PC, including web browsers, games, office software and more. See when and how long the program was used. Find out if they actually used the program or if it just sat opened and idle all day.

Document Tracking

See which files/documents are being printed or saved to removable media such as CD, DVD or USB storage devices (including memory sticks). Find out who is copying or printing potentially sensitive files or documents.

User Activity

Are they spending too much or too little time on the computer? eBlaster will report when they log in and out of Windows - and how long they actually used the computer.

Keywords Detected A powerful feature of eBlaster allows you to instruct the program to look for certain keywords or sensitive phrases. When they are found, eBlaster will record the incident and tell you who was using the computer, what words or phrases were detected, when they were found and where they were located — in a chat or instant message, in an email, on a web site or typed on the keyboard.

Convenient & Secure

With additional features such as online access to eBlaster settings, tamper-proof stealth technology, Password-Protected

Activity Reports and Communications Transport Layer Security (TLS) you can rest assured that eBlaster is the most convenient and secure monitoring and surveillance product on the market today.

**Access the eBlaster Control Panel Online... Anywhere!**

After installing eBlaster, you'll never have to visit the recorded PC again because eBlaster settings can be adjusted online! Every eBlaster report includes a link to an online version of the eBlaster Control Panel where you can change the email address where reports are sent, alter how frequently reports are sent, decide what PC and Internet activities are recorded, block additional web sites... and much, much more.

**Password-Protected Activity Reports**

Home, small business, and corporate users alike can guard against the potential of unauthorized individuals intercepting and reading Activity Reports by choosing eBlaster's password-protected WinZip file format.

**Communications Transport Layer Security (TLS)**

Corporate network administrators will be pleased to learn eBlaster permits secure email transmission on networks using TLS protocol, ensuring Activity Reports can't be intercepted and read.

**Stealth Technology**

eBlaster does not show up as an icon, does not appear in the Windows system tray, does not appear in Windows Programs, does not show up in the Windows task list, cannot be uninstalled without the eBlaster password YOU specify, and eBlaster does not slow down the operation of the computer it is recording.

Why Use eBlaster?

The Internet has a dark side. Child predators, cyber-bullying, pornography, illegal activity, gambling, hate groups, identity theft, espionage, intellectual property theft and more are just a click away. Your children and employees are human and can quickly get caught up in one or more of these activities... causing irreparable harm to themselves, your family or your business.

eBlaster is an invaluable, easy-to-use tool designed for parents and employers. With eBlaster, you can keep watch over your children and employees without restricting their ability to freely surf the Internet and gain access to the many good resources and services it offers.
